Botany/Zoology

### Toddler Program – Adventures

Children between 2 months and 3 years of age join the Toddler community, where basic motor coordination, independence, and language development are fostered and the individual personality is respected. School materials also focus on development of gross and fine motor skills. Children are guided through potty-training in this environment.

### Toddler program – Explorers/Adventurers

The Half-Day program meets 9 AM–12 PM.

The Full Day program meets 9 AM–3 PM.

The All-Day program meets 9 AM–5 PM.

There is childcare available until 3.00 p.m. to 6.30 PM for those children enrolled in the All Day program. Early morning childcare from 6.30 AM to 9.00 AM is also available.

### Primary Program – Navigators/Inventors

Between the ages of 3 and 6, children continue their work of constructing themselves through practical life and sensorial activities. Through a variety of activities, children begin to read and write. They learn about their world by studying continents, animals, plants, and other cultures. They work with concrete materials to learn mathematical concepts including the decimal system, geometry, and fractions. Arts and languages are also a part of this program. One area of the classroom is devoted to music, and art is integrated into other subjects such as math, science, geography, and culture.

Children must be fully potty-trained to enter the Primary program.

Enrollment options include half-, full-, and all-day programs.

The Half-Day program meets 9 AM–12 PM.

The Full Day program meets 9 AM–3 PM.

The All-Day program meets 9 AM–5 PM.

Early morning childcare is available from 6:30AM to 9:00AM for families that sign up. Availability is subject to state-mandated ratio requirements. There is limited childcare available until 6:30 PM or for those children enrolled in the All Day program

Math

## OUR PHILOSOPHY

As guiders, researchers and co-learners, we would intensify in each child's natural potentials. As educators, our role is to determine the child's ability to grow in each developmental area and provide the precise environment to build their skills; give access to hands-on activities and allowing adequate time and space to use materials that emphasize the lesson being studied creates an opportunity for individual discovery and construction of knowledge. Our teaching theories will inspire with the Dr. Maria Montessori method. The Montessori Method is a scientific approach that fulfills a child's mental and physical needs. It also encourages maturity of behavior in child and his self discipline and self-esteem. The positive and enthusiastic attitude will improve children's education and it will brighten their future.

## Our Mission

At Keystone Montessori Preschool Whittier we believe every child is a unique character who bring natural intelligence. They need a secure, caring and inspiring atmosphere in which to grow and mature intellectually, physically, emotionally and socially. At Keystone Montessori Preschool we challenge and support to bring their fullest natural potential in every developmental area by providing safe, supportive, challenging environment while satisfying their emotionally critical needs of respect, accept, included and secure.
